stationary

branding

the brief

3style Music are an independent record label based in Cardiff. We were approached to create a complete branding for 3style. This included, logo, stationary and a website to promote the various artist on the label and to sell albums and CD's

our approach

We worked closely with the client to produce a logo that would appeal to its audience. We wanted to create a logo that was funky and edgy and applied it to stationary, signage and web.

result!

silent city can create a complete package and look for any company. The logo is adaptable across all media (it even animates on the website). The site was designed to inform visitors about the company, and offer people the facility to buy what they heard, online. 3style Music has really taken off, they have had big hits on the Asian music scene with a top 10 music video on urban music channels such as MTV Base, Channel U, Zee TV and B4U, check out 'Realize' on the production section on our website (yep, we made that).

The site is fully secure and is search-optimised.
